

Topics

- ① Throughput
- ② Delay and packet loss in packet switched network
- ③ P2P Network, Client server - Model, Hybrid Model
- ④ API and socket addressing
- ⑤ WWW and HTTP
- ⑥ Web caching User-Server Interaction: Cookies
- ⑦ DNS, Email, FTP
- ⑧ SMTP, POP, POP3, IMAP
- ⑨ IP Addressing
- ⑩ Network Security
- ⑪

2 hrs/week

Book: Computer Networking
(A top down approach)
edition : 08

[James F. Kurose]

Reference Model (OSI and TCP/IP)

OSI Model
study yourself

ARP = Address Reference Protocol

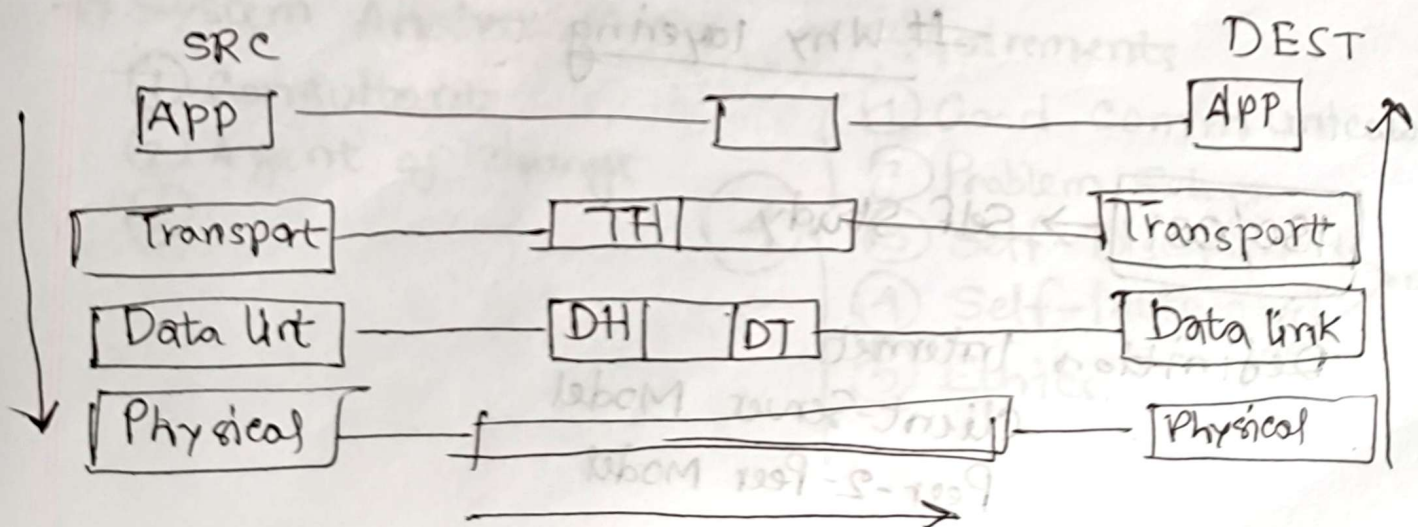

IP = Internet Protocol

TCP =

UDP =

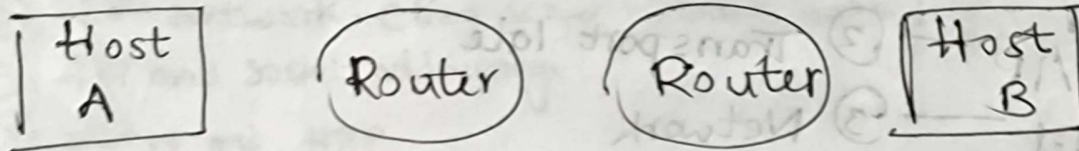

Telnet
ग्राहक

Reference Model (Horizontal Communication)

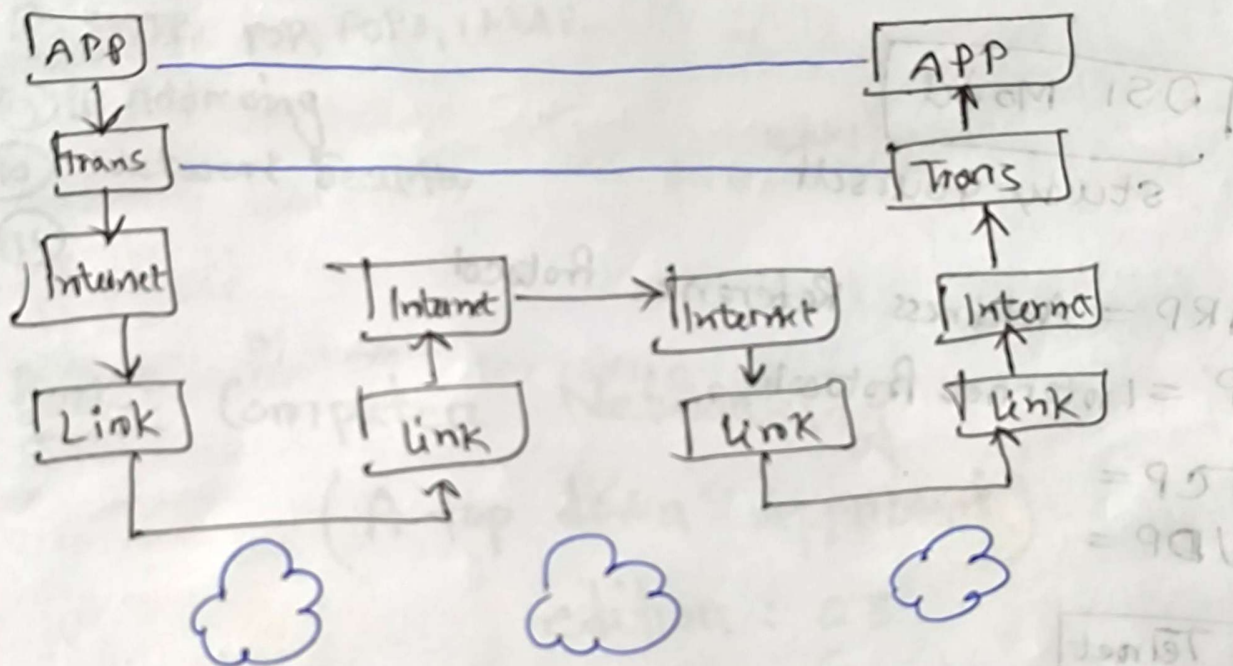

E2E Communication

Network Topology

Data flow

Organization of Air Travel

Why layering

ISO/OSI

Self Study

Definition Internet

Client-Server Model

Peer-2-Peer Model
